

# GoGreen Certificate 2024

## Clip BV

offset a total of **17.689491 tons CO<sub>2</sub> emission**  
for 2024 with GoGreen Products and Services.

DHL Group has offset the greenhouse gas emissions generated by transportation and logistics through worldwide, registered climate protection projects.

More details about the DHL GoGreen Projects Portfolio and selection criteria can be found at: [group.dhl.com/climate-protection-projects](https://group.dhl.com/climate-protection-projects)

**Andreas Mündel**

Senior Vice President  
Strategy & Operations Programs

This certificate is issued by DHL Group to business customers. The greenhouse gas emissions stated on this certificate (reported as CO<sub>2</sub>e\*) include emissions from transport and logistics as well as upstream emissions from fuel and energy production. The emissions have been calculated and offset via expenditures on climate protection projects as mentioned above. SGS (Société Générale de Surveillance) has verified the tracked greenhouse gas emissions and the related offsets against the Carbon Management System and according to the "Greenhouse Gas Protocol – Product Life Cycle Accounting and Reporting Standard" for the period of 01.01.2024 to 31.12.2024.

Effective climate action requires prioritizing direct emission reductions within the mode of transportation. According to the GHG Protocol and SBTi, offsetting as part of "Beyond Value Chain Mitigation" should only be considered a supplementary measure after all feasible reduction options have been explored. While carbon offsetting can play a role in climate strategies, avoidance offsets do not directly reduce emissions and thus are not suitable for carbon accounting purposes.

\* CO<sub>2</sub>e: The CO<sub>2</sub> equivalents for emission compensation include carbon dioxide (CO<sub>2</sub>) and other greenhouse gases such as methane (CH<sub>4</sub>).
